

IL PULITO, CON CURA.

Top Wet Cleaning

USA proposes the new Iwash range of machines for water washing, designed to organize in a dynamic and flexible way any of your washing and textile treatment needs.

With **IWASH** you can effectively plan your programs thanks to a specific and user-friendly software, which enables you to check directly all the parameters of the washing programs.

With **AIR MIX**, the exclusive system for blowing air directly into the dip, you can reduce mechanical action and anyway allow an optimal mixing and a delicate cleaning effect on air cushion.

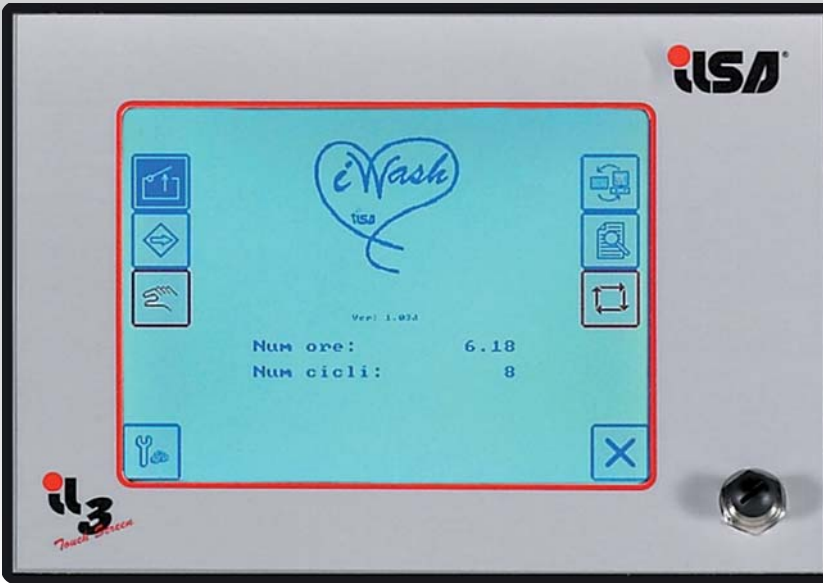

Air mix inside

Top Service

IWASH is the ideal complement for cleaning service. In fact, together with the dry cleaning, you can offer your customers a complete and high quality washing. A special pre-loaded library enables you to select the most suitable program for garments, blankets, curtains, feathers and many more applications you can specifically manage according to the typology of the chemical you chose to use to offer a perfect service.

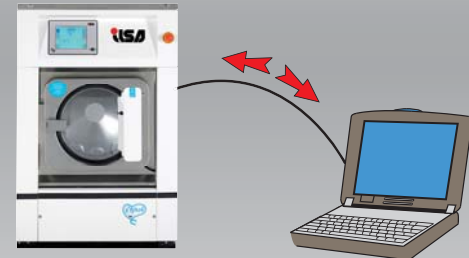

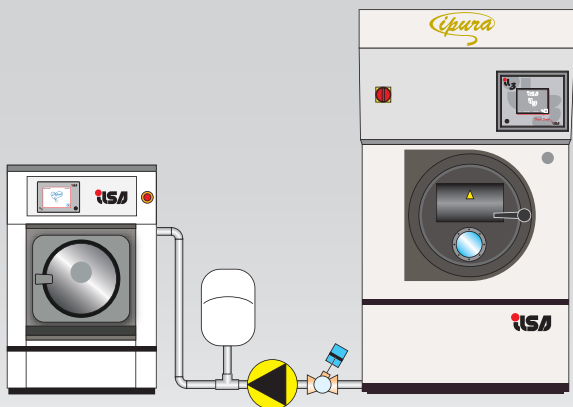

- 50 programs up to 60 steps
- Digital litre/centimetres counter
- Managing of 6 peristaltic pumps with merchandize weight / time feature
- Drum and ramp speed control during washing and centrifuge
- Direct Air Mix management
- Manual Full Screen feature

Flex cleaning

i3 is the touch-screen computer, complete with 50 user programs, which allows you to build in detail the suitable program according to the type of load to be treated and to the kind of chemicals being used.

i3 enables you to connect to a PC thanks to the proper software. You will therefore easily create and modify your washing programs as you like.

100% IPURA ready

IWASH can be effectively connected to a **IPURA** dry-cleaning machine in order to optimize water management sharing. In fact, in its **WMS** version, **IPURA** is equipped with a cooling water storage tank, which can wholly automatically feed your **IWASH** and thus optimize water consumption.

IWASH and **IPURA** share the same pc; with the same logic you will therefore easily use both machines in a simple and effective way.

Textile treatments

Thanks to the great software flexibility, **IWASH** enables you to plan specialized programs for wool process like fulling.

You can realize dedicated program libraries for each kind of yarn or for each customer and manage them orderly planning both results and history.
